About the Job

As a **Data Center Facility Engineer**, you will work in one of Amazon's advanced data centers. These data centers are the backbone of Amazon's services, like online shopping, video streaming, and cloud computing. Your job will be to maintain the facility and ensure it runs perfectly. This role is all about keeping things safe, secure, and efficient.

Amazon is known for its innovative approach and offers an environment where you can learn and improve every day. You will work with a team of talented people and advanced tools to manage daily operations.

Key Responsibilities

Here's what you will do as a **Data Center Facility Engineer**:

1. Maintain Equipment

- Monitor cooling systems, power supply, and generators.
- Perform regular checks on equipment to ensure they work properly.

2. Solve Problems

- Quickly fix any issues that arise in the facility.
- Use troubleshooting skills to find the cause of problems.

3. Ensure Safety

- Follow Amazon's safety rules and guidelines.
- Keep the workplace safe for everyone.

4. Plan Maintenance

- Schedule repairs and upgrades to keep systems updated.
- Work with contractors and technicians for big tasks.

5. Monitor Systems

- Keep an eye on energy usage and environmental conditions.
- Report any unusual activity to the management team.

This job requires attention to detail and the ability to stay calm under pressure.

Every day is different, and you will face new challenges to solve.
